

Install Sun Java Plug-In for PRISM

*You will need administrator rights to your computer to install Java.
Please contact your technical support group for assistance.*

1. Go to the following web site to download the Sun Java plug-in.

<http://www.java.com/en/download/manual.jsp>

** Additional Java parameter setups are required after installation is complete (page 4). **

Available Operating Systems

- » Windows
- » Solaris
- » Linux
- » Apple

Java Downloads for All Operating Systems

Recommended Version 6 Update 13

Select the file according to your operating system from the list below to get the latest Java for your computer.

> [Other Java Versions](#) > [What is Java?](#)

Downloads are subject to our [license agreement](#)

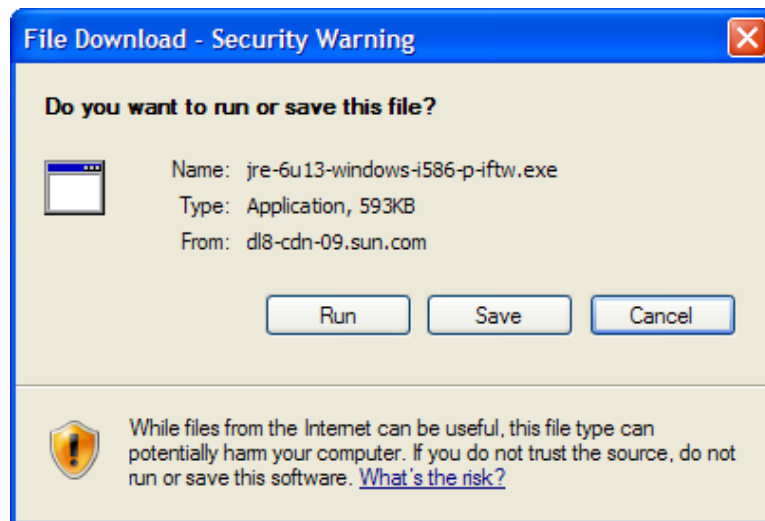

Once you have installed Java on your computer, you might be required to restart your browser. You can verify that it has been installed correctly by clicking 'Verify Now' below.

Windows	
 Windows XP/Vista/2000/2003/2008 Online filesize: ~ 10 MB *	Instructions Verify Now
 Windows XP/Vista/2000/2003/2008 Offline filesize: 15.53 MB	Instructions After installing Java, restart your browser and verify Java has been installed correctly.

» [Information about the 64-bit Java plug-in](#)

* Typical download size is 10 MB, which is the minimum download. The size may increase if additional features are selected.

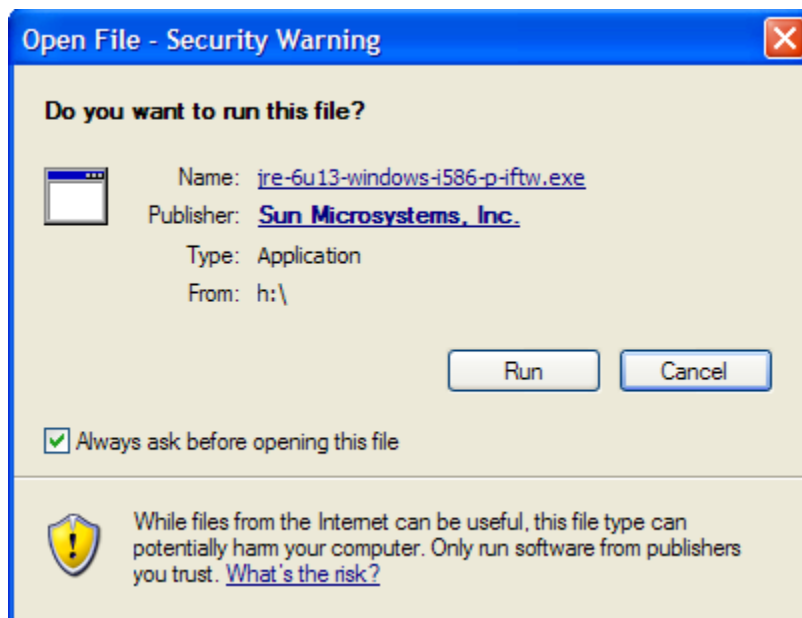

2. Click the Windows XP/Vista/2000/2003 Online* link. The File Download dialog box will appear.

3. Click the Save button. The Save As dialog box will appear.
4. Choose a folder location. (Save the file to a known location on your computer, such as your desktop)
5. Click Save.

Note: If you have previously downloaded this version of Java, you may be prompted: File already exists. Do you want to replace it? Click Yes to replace.

6. Verify that the name of the file is correct.
7. Close all applications including the browser.
8. Double-click on the saved file icon to start the installation process.

9. Click Run.
 - The installer unpacks the files needed for the installation, which takes less than a minute. After unpacking the installation files, a Welcome window is displayed; the installer presents an option to view the license agreement.
10. Click Accept to accept the license agreement and continue the installation process.

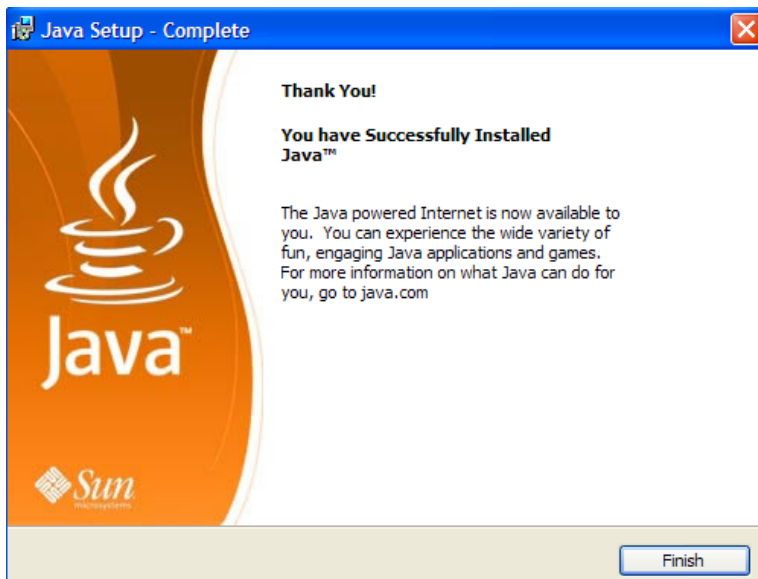

11. Sun Microsystems has partnered with companies that offer various products. The installer may present you with an option to install these programs when the Java is installed. These programs could potentially conflict with PRISM. Unselect the check box to choose NOT to install other programs. Click Next to continue the installation.

12. If additional programs have been selected, the installer displays a Custom Setup screen that allows you to choose program features to set up. We recommend that you keep the default settings. Click Next to continue with the installation.

13. The Progress window tracks the installation process.

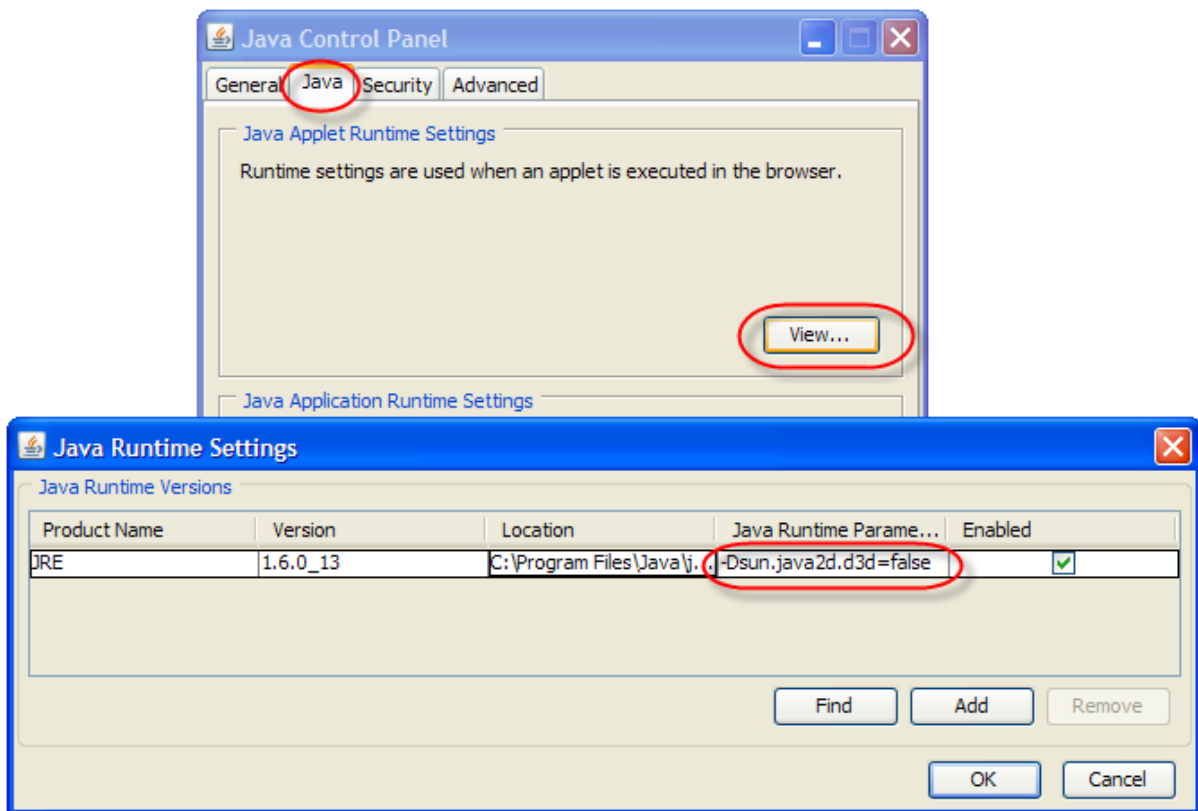

14. A few brief dialogs confirm the last steps of the installation process. The following message should then appear with the confirmation of a successful installation.

****For Java Version 6 update 12 and above the following must be completed****

1. Open the Java Control Panel.
2. Click the Java Tab.
3. In the Java Applet Runtime Settings section, click the View button.
4. Double-click the Java Runtime Parameters field and add the following parameter.

-Dsun.java2d.d3d=false

5. Click the OK button.
6. Click the Apply button.
7. Close and restart Internet Explorer.

Verify Installation

1. Login to the PRISM application.

https://oak.p3.pitt.edu:9032/oa_servlets/AppsLogin

2. Enter your user name and password.
3. Click Login.
4. Select a non self-service Responsibility and then select a Function as shown in the example below.
