

EMD Chemicals, Inc.
Calbiochem®, Novabiochem®, and Novagen®

The University of Pittsburgh's Supplier Management Department is pleased to announce the addition of **EMD Chemicals** as a University-Wide Contracted Supplier and their special contract discount offering to all University Departments and Schools.

EMD Chemicals is pleased to offer the University laboratory and research community Calbiochem®, Novabiochem®, and Novagen® products through the University PantherBuy site. **All orders placed with EMD through PantherBuy will include free shipping, ice and hazardous fees, a substantial total savings for the end user!**

EMD is Merck KGaA, Darmstadt, Germany in the US and Canada. EMD provides a broad range of innovative life science research products used worldwide in disease-related life science research. These products are known globally through our product brands Calbiochem®, Novabiochem®, and Novagen® which offer solutions to scientists at the cutting edge of research.

EMD is also a leading manufacturer of high purity solvents and chemicals, analytical reagents, microbiology media, chromatography, air monitoring equipment, and specialty products for laboratory applications. With more than 29,000 products in their portfolio, EMD products can be found and are utilized in nearly every laboratory.
